Mouad El Bouanani

Software Engineering Student

Professional Summary

Passionate Software Engineering student specializing in Full-Stack development with expertise in building high-performance software solutions. Strong command of Spring Boot, React, Angular, and Node.js ecosystems with solid foundation in software development best practices including testing, CI/CD, and containerization with Docker. Autonomous, detail-oriented, and results-driven professional seeking a PFE internship to apply technical expertise in innovative, high-impact projects that leverage modern technologies and agile methodologies.

Education

2023–Present **Engineering Degree**, *École des Sciences de l'Information (ESI)*, Morocco
Full Stack Engineering | Software Engineering – ISITD Specialization
Expected graduation: 2026

2021–2023 **DEUG in Physical Sciences**, *Faculté des Sciences Semlalia*, Marrakech
Physics and Material Sciences – Honors

Technical Skills

Languages	Java, TypeScript, JavaScript, Python, SQL
Frontend	React, Flutter, Angular, Bootstrap, TailwindCSS
Backend	Spring Boot, Node.js, Express.js, FastAPI, Microservices, WebSocket
Security	JWT, OAuth2, Hashing (SHA-256), Symmetric/Asymmetric Encryption (RSA, AES)
DevOps	Docker, GitHub Actions, Jenkins, CI/CD, Kubernetes
Cloud	AWS (Cloud Practitioner Certified), Oracle Cloud Infrastructure
Databases	PostgreSQL, MongoDB, MySQL, Firebase
Data & AI	Power BI, Pandas, NumPy, ETL, Machine Learning, Blockchain

Professional Experience

Aug–Sep 2025 **Web Development & SEO Optimization Intern**, *ProBioWell*, Remote
E-commerce platform optimization and technical infrastructure enhancement

- Conducted comprehensive **technical SEO audit** of WordPress/WooCommerce e-commerce platform, identifying and resolving critical issues that improved PageSpeed score from 64 to 86
- Implemented secure **SMTP email system** for transactional communications, enhancing delivery reliability and customer experience
- Optimized website performance through code minification, image compression, and caching strategies

Jul–Aug 2025 **Full-Stack Developer Intern**, *Office Chérifien des Phosphates (OCP)*, Ben Guerir
Enterprise on-call management system development using MERN stack

- Engineered comprehensive **on-call rotation management application** featuring automated scheduling, availability tracking, real-time notifications, and escalation workflows
- Architected and developed secure **RESTful API** with JWT authentication, integrated with MongoDB for data persistence and containerized using Docker for deployment
- Created detailed **functional specifications**, UML diagrams, and comprehensive test documentation with API validation using Postman and Swagger
- Implemented real-time WebSocket communications for instant on-call updates and emergency notifications

Jul–Sep 2024 **Digital Repository Platform Intern**, *Open National Repository – MESRSI*, École Normale Supérieure, Casablanca

National academic digital archives infrastructure deployment

- Deployed **ArchUH2 digital archives platform** based on DSpace 8.0 with comprehensive technology stack including Java 17+, PostgreSQL 15, Apache Solr 8, and Apache Tomcat 10
- Processed and integrated scientific research data with advanced metadata management and search indexing optimization for enhanced discoverability
- Configured institutional repository workflows for document submission, review, approval, and publication with role-based access controls

Notable Projects

2024–2025 **SkillMatch - AI-Powered Skills Marketplace Platform**, *Spring Boot, Kafka, PostgreSQL, MongoDB*

Microservices marketplace connecting professionals through intelligent AI matching algorithm with weighted scoring based on skills, experience, reputation, and geographic proximity | Apache Kafka for event-driven asynchronous communication between services | PostgreSQL Neon for relational data management, MongoDB Atlas for document storage, Redis for caching layer | Firebase for authentication, WebSocket (STOMP) for real-time chat functionality, Firebase Cloud Messaging for push notifications, role-based access control supporting Client, Provider, and Admin roles | Docker Compose orchestrating 7 microservices with infrastructure components | Spring Cloud Gateway for dynamic service routing and load balancing across microservices architecture

2025 **CollabSpace - Microservices Collaboration Platform**, *Spring Boot, Spring Cloud, Kafka*

Enterprise-grade collaboration platform built on microservices architecture with distributed services for user management, project tracking, task assignment, messaging, and notifications | Spring Boot services with Feign client inter-service communication and Kafka event streaming | Spring Cloud ecosystem including API Gateway with JWT security, Eureka Service Discovery, and Config Server for centralized configuration | PostgreSQL databases per service following database-per-service pattern | Docker containerization for deployment scalability

2024–2025 **Taawoniyat Mobile - Multi-Vendor E-Commerce**, *React Native, Spring Boot, Firebase*

Cross-platform mobile marketplace application supporting multiple vendors with comprehensive product catalog, shopping cart, order management, and payment processing | Spring Boot backend with REST APIs for user authentication, product CRUD operations, order processing, and vendor management | Firebase integration for media storage, real-time database synchronization, and push notifications | PostgreSQL for transactional data with Docker deployment

2024 **Employee Management - Full-Stack Application**, *Spring Boot, Docker, Jenkins*

HR management system with complete employee lifecycle tracking from recruitment to termination | UML modeling for system architecture and database design | Spring Boot REST APIs with comprehensive CRUD operations | CI/CD pipeline implementation using Jenkins for automated builds and Nexus for artifact repository management | Docker containerization for consistent deployment across environments

Certifications

2025 **Oracle Cloud Infrastructure 2025 Certified Foundations Associate** - Oracle University, comprehensive cloud fundamentals including compute, storage, networking, and security

2024 **AWS Cloud Practitioner (CLF-C02)** - DataCamp, covering AWS core services, cloud architecture, security best practices, billing, and cost management strategies

Soft Skills

Problem-solving, Team collaboration, Agile methodologies (Scrum, Kanban), Communication, Adaptability, Time management, Autonomous learning

Languages

Arabic	Native language
French	Fluent (B2)
English	Professional working proficiency (B2)
